

MANUAL CALL POINTS/PULL STATIONS

## MCP5A Indoor Callpoint

The MCP5A product has the Advanced Protocol embedded. A version of this call point with built in isolation is also available.

### Overview

Feedback

Installation efficiency, flexibility and full compliance with the latest standards are at the heart of the new MCP Indoor Call Point range. Installation time and ultimately cost, are of paramount importance to any fire or security installer. The MCP5A product has the Advanced Protocol embedded. A version of this call point with built in isolation is also available. The MCP range directly reflects this need by providing a unique 'plug and play' concept designed specifically to reduce installation time. All new MCP products utilize a special terminal block, where all initial installation cabling is terminated. This terminal block is then simply connected to the back of the MCP. Simple, but effective with no re-termination required and no time wasted.

#### Features & Benefits:

- Unique 'Plug & Play' installation concept
- Total 'Flex-Ability' in the choice of operating element
- Anti-Tamper facility
- Enhanced aesthetics
- Backward compatibility

#### Certifications:

- EN54
- LPCB
- VDS
- CPD
