

COMBINATION STROBES

Intelligent Wall Mount Sounder Strobe

Intelligent wall mounted sounder strobe with two lens colors

Overview

Feedback

VAD-series wall mount sounder beacon is a high quality loop powered device designed to alert building occupants of an emergency. It utilises the B501AP base for improved installation flexibility. When triggered by the fire panel its powerful sounder and intense beacon give a visible and audible warning. A choice of output levels and tones make the device suitable for a wide variety of applications

Features & Benefits:

- Faster installation
- Reduced full life costs
- Flexible installation
- Reduced inventory count
- Excellent system performance

Certifications:

- EN54-23 approved
- LPCB
- VdS
- Approved & Listed to AS 7240.3
- SAI Global Listing# SMK40640-5
- AS 7240.23

- Brand : KACIMorley-IAS
- Product Type : Sounder Strobe
