

TX7932

Handheld Programmer

Features and Benefits

- Write, read and erase device parameters for TNA TX3, TX7 and TN7 series.
- The detector base can be attached at the back of the programmer.
- Pluggable cable with end alligator clip to hold tight the terminals
- LCD display and functional keys
- Low current consumption for longer battery lifespan
- Circuit protection against clip
- Auto power-off within 3 minutes

Overview

The TX7932 is the general-purpose programming tool use for TX3, TX7 fire alarm system and TN7 fire telephone system family products. This unit is designed to suit for entering device parameters such as address, sensitivity, mode and types to meet the site situation and environmental requirements. In addition, the programmer is capable to read the previous encoded parameters to use for testing application and troubleshooting purposes.

The TX7932 is miniature and robust design makes it convenient to bring in the work place. The programmer is packed with twin 1.5V AA battery and cable, ready for usage once received. Easy to understand the display and with functional keys allow easy single-button activation of the common used parameters.

Names and Location

① Data Display

16 Characters, four-segment display shows the device address, set types and mode and ID value

② Function Key

Allow easy single-button activation of the common used parameters such as **exit**, **clear**, **page**, **read** and **write** function 0 to 9 keys used to enter numeric values

③ Jack Socket

Location for male connector of programming cable

④ Cross Screw

Fixed metal contact sheet

⑤ Detector Base Mount

The detector base can be attached at the back of the programmer.

⑥ Metal Contact sheet

Use for settings the addressable modules

⑦ Battery cover

Location for programmer batteries

⑧ MICRO-USB Link

Connect MICRO-USB to Power Handheld for power supply
